Since people have always enjoyed unwinding and having fun, they have created numerous
devices or simply exploited resources that were available to them. That is how things
familiar to us were created: balls, skittles before that they were just stones and sticks.
But now we have all these technology and devices, thanks to which the gaming component
of everyday life has increased many times. Since modern browsers have stopped
supporting Flash technology since 2024, games based on this system are gradually
leaving web pages. However, there are still some of the most popular toys that
work in browsers using special emulators. HTML5 technology significantly expands
the possibilities for players. Created using modern developments, HTML5 games can
be launched both on desktops and on many other devices of various modifications.
