<p> </p><p> The TL;DR version of this review is: surprising light, extremely pocketable, does the job, not my dream charger but at 6 , £ the price it's well worth it.</p>
<p> We've covered a product of Lepow's before, the Moonstone. Like the Moonstone, the Poki comes 6 , £ with a cloth carrying case that you can stash a USB cable in (it appears to come with a 6 ± 6 , £ USB-> MicroUSB,) or chuck your ID and credit card in and use it as a wallet while you're out. It's 6 , £ actually the first thing that stood out when I was looking at the device. The Moonstone is still going strong 6 , £ with a friend of mine a year later.</p>
<p> The battery delivers a 90% conversion efficiency rating according to specs on the 6 , £ manufacturer's website. Most batteries go from the high 70's to mid 80's. You want to see a higher number as 6 , £ this is how much power gets delivered with the rest being lost in conversion.</p>
<p> The Poki can charge and recharge at 6 , £ 2.1amps. This means you're not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you should 6 , £ be able to charge this in under five hours and with 90% conversion efficiency you should have around 9000mAh of 6 , £ actual juice to spare. That should be enough for at least three complete charges from dead to full for any 6 , £ smartphone on the market today.</p>
<p> 2.1 amp charging also means you're not going to spend 7 hours charging
