wikipedia : wiki . Probability interpretations A probability of an event is a number between 0 and 1, inclusive, that indicates the likelihood of the event occurring. This number is called the probability of the event. The probability of an event is always between 0 and 1, inclusive. 0 indicates impossibility and 1 indicates certainty. The probability of an event is denoted by P(A) or p, where A is the event and p is the probability. The probability of an event is a number between 0 and 1, inclusive. 0 indicates impossibility and 1 indicates certainty. The probability of an event is denoted by P(A) or p, where A is the event and p is the probability. The probability of an event is a number between 0 and 1, inclusive. 0 indicates impossibility and 1 indicates certainty. The probability of an event is denoted by P(A) or p, where A is the event and p is the probability.

Making API Calls The first step in making an API call is knowing the Uniform Resource Locator (URL) for the application or server that the API will access. This is the destination of the request issued when making an API call. The second step is to choose which command to send with the request.
