<p></p><p>The TL;DR version of this review is: surprising ligh
t, extremely pocketable, does the job, not my dream charger but at /, the price
it s well worth it.</p>
<p>We ve covered a product of Lepow s before, the Moonstone. Like the Moon
stone, the Poki comes /, with a cloth carrying case that you can stash a USB ca
ble in (it appears to come with a 6 ‡ /, USB-> MicroUSB,) or chuck your ID an
d credit card in and use it as a wallet while you re out. It s /, actually the
first thing that stood out when I was looking at the device. The Moonstone is st
ill going strong /, with a friend of mine a year later.</p>
<p>The battery delivers a 90% conversion efficiency rating according to sp
ecs on the /, manufacturer s website. Most batteries go from the high 70 s to m
id 80 s. You want to see a higher number as /, this is how much power gets deli
vered with the rest being lost in conversion.</p>
<p>The Poki can charge and recharge at /, 2.1amps. This means you re not
stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you should
/, be able to charge this in under five hours and with 90% conversion efficien
cy you should have around 9000mAh of /, actual juice to spare. That should be e
nough for at least three complete charges from dead to full for any /, smartpho
ne on the market today.</p>
<p>2.1 amp charging also means you re not going to spend ~7 hours charging
a 3000mA phone /, from dead, more like an hour and a half if your phone suppor
ts it.charging that fast.</p>
