<p>I just bought this, as , I was looking for a game that is exactly this premise. Alas, when I found this game, I bought it , and I was extremely disappointed. Just loading up the game took forever, and I kept having to close and reopen , it. When it finally opened, it took 17 minutes just to do that. Yeah . Now it's not like I have , a terrible laptop, my laptop is really good and I've never had any issues with such a thing. Then, upon , opening the game, I couldn't look around because the default settings were set to ultra. For the record, I don't , really have an issue with game devs doing this, but it leaves a bitter taste in your mouth. I had , to set the quality to very low and even then it was still so laggy. It was 2 fps at , the most (like, no) Tj T* BT /F

so , it was quite literally just pixels. The game was also very repetitive, so even if you have a NASA super-computer , you will get bored of this really quickly. I do not suggest this to anyone, no matter how enticing it , looks. It was terrible and so incredibly frustrating; especially because I kept having to meddle with the settings and make , the game actually playable (spoiler alert) Tj T* BT
