The steelwork was prefabricated as a series of #128170; portal frames that were craned down the alley and site-welded together. Given that every inch in such a narrow space #128170; was valuable we chose to fully weld the connections and express the frame internally, even utilising the depth of the #128170; steels to maximise the space.</p><p>Alongside the painted steel a simple palette of spruce plywood, douglas fir joists, terrazzo and cork #128170; flooring enriches the interior. Externally the timber framed walls are clad in handmade pewter glazed brick slips with a patina #128170; that reflects the changing light of the sky. Both the simply landscaped and planted rear courtyard and the garden in #128170; front of the house enhance the feeling of space in this small dwelling.</p><p>This self-build project had a long gestation, fitted #128170; in around professional and family life. The design and construction were developed as time and money allowed so whilst planning #128170; consent was given in January 2014 and the ground works commenced in the spring of 2024, the building was not #128170; completed until August 2024. We worked closely with friend and joiner Michael Tye to lead a small team of local #128170; subcontractors and employed specialist fabricators for certain key packages as well as undertaking a fair amount of the work ourselves.</p><p>The #128170; result is a unique and highly crafted home that is a testament to the commitment, effort and support of many #128170; people. By replacing a narrow disused alley with this comfortable small home we hope to have enhanced the streetscape we #128170; inhabit. As the building completes the terrace, so does the front garden - with the simple bin store, planting, level #128170; access and bike parking we aimed to keep it open and reinforce the pavement line without making a hard boundary. #128170; The development highlights the
