hs or years. Generally, market crashes when a large number of investors invest in the stock market to such an extent that it becomes a market of investors. In 1929, the US stock market crashed, and it took years for it to recover. The 1980s and 1990s saw a period of economic growth, but the dot-com bubble burst in 2000, leading to a market crash. The 2008 financial crisis was another major event, with the global economy entering a recession. The market has since recovered, but volatility remains high. Analysts predict that the market will continue to be volatile in the coming years.
