Understanding Ski Jumping: An Overview

Ski jumping is a thrilling winter sport where athletes descend a steep

ramp at high speeds, leap into the air, and aim to land the longest jump

possible before gliding to the finish line. But how are these impressive

feats measured and scored?

The Measurement of Ski Jumps: K-Point and Beyond

In ski jumping competitions, judges measure jumps from the takeoff

to a reference point called the "K-point," which indicates the

assessment location for the distance covered by the athlete. The following

table illustrates the relationship between jump distance (in meters), K-point

and maximum landing point:
