Unfortunately, his reputation was hurt after failing a drug test on two separate occasions! The most famous MMA fighter who tested positive for steroids was Steve DeStefano, a former UFC fighter who was suspended for 6 months in 2006 for testing positive for testosterone.

Stanozolol is an anabolic agent, a selective androgen receptor modulator (SARM), and a steroid. The term "more than 2 goals Asian" refers to a form of sports betting, more specifically in football. In this type of bet, the bettor bets on a specific team to score more than 2 goals in a game. The word "Asian" refers to the origin of this type of bet, which was first used in Singapore and then spread to other parts of Asia.

In simple terms, if a bettor bets "more than 2.5 goals Asian" on a specific game, it means that the bettor is betting that the chosen team will score at least 3 goals in total during the game. If the team scores 2 goals or fewer, the bettor loses the bet. However, if the team scores 3 goals or more, the bettor wins the bet.

It is important to note that, unlike traditional bets, "more than 2 goals Asian" bets do not offer protection against draws. For example, if a bettor bets "more than 2.5 goals Asian" and the game ends in a 2-2 draw, the bettor loses their money. This makes "more than 2 goals Asian" bets a popular choice among sports bettors, as they offer a higher potential return on investment.
