<div>API Call in JavaScript Using the fetch() method
<t> fetch is a method to call an API in JavaScript. It is used to fetch resou
rces from a server. All modern browsers support the fetch method. It is much eas
y and simple to use as compared to XMLHttpRequest.</div></div></d

<t></div></div></div><div>Making API Calls The first st
ep in making an API call is knowing the Uniform Resource Locator (URL) for the a
pplication or server that the API will access. This is the destinat
ion of the request issued when making an API call. The second step is to choose
which command to send with the request.</div></div></div></div></div>
