<p></p><p>The TL;DR version of this review is: surprising ligh

t, extremely pocketable, does the job, not my dream charger but at 🏧 th

e price it s well worth it.</p>

<p>We ve covered a product of Lepow s before, the Moonstone. Like the Moon

stone, the Poki comes 🏧 with a cloth carrying case that you can stash a

USB cable in (it appears to come with a 6 † 🏧 USB-> MicroUSB,) or ch

uck your ID and credit card in and use it as a wallet while you re out. It s

27975; actually the first thing that stood out when I was looking at the device

. The Moonstone is still going strong 🏧 with a friend of mine a year la

ter.</p>

<p>The battery delivers a 90% conversion efficiency rating according to sp

ecs on the 🏧 manufacturer s website. Most batteries go from the high 70

s to mid 80 s. You want to see a higher number as 🏧 this is how much p

ower gets delivered with the rest being lost in conversion.</p>

<p>The Poki can charge and recharge at 🏧 2.1amps. This means you

re not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you

should 🏧 be able to charge this in under five hours and with 90% conve

rsion efficiency you should have around 9000mAh of 🏧 actual juice to sp

are. That should be enough for at least three complete charges from dead to full

for any 🏧 smartphone on the market today.</p>
