Wikipedia: Probability interpretations A probability of an event is a number between 0 and 1, inclusive, that indicates the likelihood of that event occurring. This number is always between 0 and 1, inclusive. 0 indicates impossibility and 1 indicates certainty. The probability of an event E is denoted $P(E)$, read as "P of E", where P stands for probability. It is also common notation to use $P(A)$ for the probability of an event A occurring.
