One of the main ways that we work out how to calculate a percentage of a number is by converting the percentage to a decimal first.

In order to do this, we find 1% of the number by dividing it by 100%. Once we've done that, we multiply our answer by the value of the percentage we're looking for.

To find 1% of something (1/100 of something), divide by 100.

Remember how to divide by 100 mentally:

Just move the decimal point two places to the left. For example, 1% of 540 is 5.4. And 1% of 8.30 is 0.083.
