There are five components of physical fitness: (1) body composition, (2) flexibility, (3) muscular strength, (4) muscular endurance, and (5) cardiovascular fitness.

Physical fitness would include activities that address all of the health-related components of fitness. Exercise guidelines for adults recommend at least 150 minutes of moderate-intensity aerobic activity or 75 minutes of vigorous-intensity aerobic activity per week, plus muscle-strengthening activities on two or more days per week.

Overall, men (6.0 hours per week) spent more time than women (3.2 hours per week) in moderately intensive physical activity while at work. Overall, the amount of time spent walking at work on an average work day (in the last four weeks) was similar among men (1.9 hours) and women (1.7 hours).
