When used together, these medications can help treat scalp conditions such as seborrheic dermatitis. A common condition that causes an itchy (and flaky) scalp. The combination of sertaconazole nitrate and mometasone furoate can help alleviate "symptoms" such as itching.

It is important to follow the instructions provided by your healthcare provider when using these medications. Typically, the solution is applied directly to the scalp and massaged in "gently". You may see improvement in symptoms after several weeks of use.

As with any medication, sertaconazole nitrate and mometasone furoate topical solutions can cause side effects. Common side effects may include burning (or irritation at the application site).

If you experience severe side effects such as worsening of symptoms or

an allergic reaction, stop using the medication immediately.

In summary, sertaconazole nitrate and mometasone furoate topical solution is a medication used to treat scalp conditions such as seborrheic dermatitis. By combining an antifungal medication and a corticosteroid,

allowing for better results.
